

## Ideation Phase

### Define the Problem Statements

|               |                        |
|---------------|------------------------|
| Date          | 02 July 2026           |
| Team ID       |                        |
| Project Name  | Heart Disease Analysis |
| Maximum Marks | 2 Marks                |

#### Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

|                            |                                                                                                |                                                                             |
|----------------------------|------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------|
| <b>I am</b>                | Describe customer with 3-4 key characteristics - who are they?                                 | Describe the customer and their attributes here                             |
| <b>I'm trying to</b>       | List their outcome or "job" the care about - what are they trying to achieve?                  | List the thing they are trying to achieve here                              |
| <b>but</b>                 | Describe what problems or barriers stand in the way - what bothers them most?                  | Describe the problems or barriers that get in the way here                  |
| <b>because</b>             | Enter the "root cause" of why the problem or barrier exists - what needs to be solved?         | Describe the reason the problems or barriers exist                          |
| <b>which makes me feel</b> | Describe the emotions from the customer's point of view - how does it impact them emotionally? | Describe the emotions the result from experiencing the problems or barriers |

#### Example:

|                |                                                 |                                                                 |                                                  |                                                              |
|----------------|-------------------------------------------------|-----------------------------------------------------------------|--------------------------------------------------|--------------------------------------------------------------|
| I am           | I'm trying to                                   | But                                                             | Because                                          | Which makes me feel                                          |
| A Cardiologist | Identify patients at high risk of heart disease | Large amounts of patient data are difficult to analyze manually | Important health patterns are hidden in the data | Challenged in making quick and accurate healthcare decisions |

| <b>Problem Statement (PS)</b> | <b>I am (Customer)</b>                | <b>I'm trying to</b>                                                                               | <b>But</b>                                                                                      | <b>Because</b>                                                                       | <b>Which makes me feel</b>                            |
|-------------------------------|---------------------------------------|----------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------|-------------------------------------------------------|
| PS-1                          | A Cardiologist working in a hospital. | Analyze patient data to identify people at high risk of heart disease and improve early diagnosis. | The patient data is large, complex, and difficult to analyze manually.                          | Important trends and risk factors are hidden within the data.                        | Challenged in making quick decisions.                 |
| PS-2                          | A Public Health Officer.              | Study heart disease patterns to create awareness and preventive healthcare programs.               | I cannot easily identify the major lifestyle and medical factors contributing to heart disease. | The available healthcare data is not presented in an interactive and meaningful way. | Unable to make informed policy decisions effectively. |
