

Project Design Phase-II Data Flow Diagram & User Stories

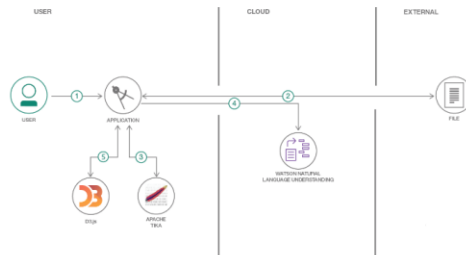

Date	02 July 2026
Team ID	
Project Name	Heart Disease Analysis
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Example: (Simplified)

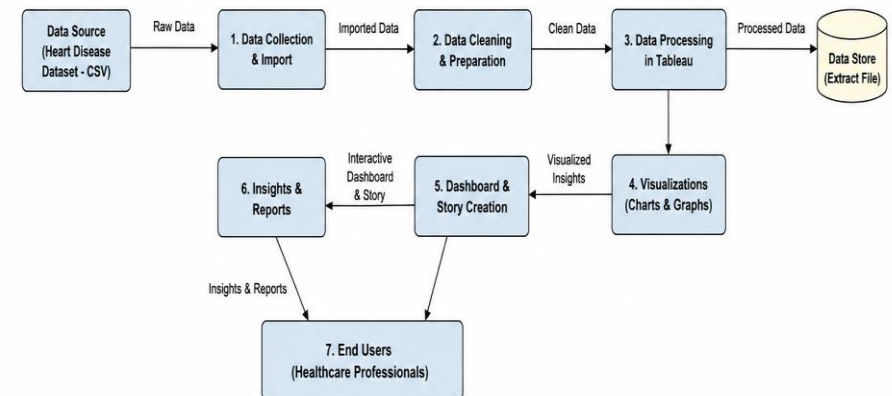

Flow

1. User configures credentials for the Watson Natural Language Understanding service and starts the app.
2. User selects data file to process and load.
3. Apache Tika extracts text from the data file.
4. Extracted text is passed to Watson NLU for enrichment.
5. Enriched data is visualized in the UI using the D3.js library.

Example: DFD – Heart Disease Analysis

Data Flow Diagram (Level 0) – Heart Disease Analysis

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Healthcare Professional	Data Collection	USN-1	As a user, I want to import the heart disease dataset into Tableau for analysis.	Dataset is imported successfully.	High	Sprint-1
Healthcare Professional	Data Preparation	USN-2	As a user, I want to clean and prepare the dataset before visualization.	Clean and structured dataset is available.	High	Sprint-1
Healthcare Professional	Data Visualization	USN-3	As a user, I want to create interactive charts for heart disease analysis.	Charts display correct information.	High	Sprint-1
Healthcare Professional	Dashboard	USN-4	As a user, I want an interactive dashboard to explore patient data.	Dashboard responds to filters correctly.	High	Sprint-2
Healthcare Professional	Story	USN-5	As a user, I want to present the analysis through Tableau Story.	Story displays all analysis steps clearly.	Medium	Sprint-2
Healthcare Professional	Filtering	USN-6	As a user, I want to filter data by age, gender, diabetes, and smoking.	Filtered results are displayed accurately.	High	Sprint-2
Healthcare Professional	Reporting	USN-7	As a user, I want to publish the dashboard and share insights.	Dashboard is successfully published.	Medium	Sprint-3
Healthcare Professional	Decision Support	USN-8	As a user, I want to identify high-risk patient groups.	Dashboard provides meaningful insights.	High	Sprint-3
