

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	02 July 2026
Team ID	
Project Name	Heart Disease Analysis
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Data Collection	Import the Heart Disease CSV dataset into Tableau Validate and verify the dataset before analysis
FR-2	Data Preparation	Clean and preprocess the data Handle missing values and assign correct data types
FR-3	Data Visualization	Create interactive charts and graphs Generate visualizations for heart disease analysis
FR-4	Dashboard & Story	Design an interactive dashboard Create Tableau Story with insights and conclusions
FR-5	Data Filtering & Analysis	Apply filters based on Age, Gender, Race, Diabetes, Smoking, and Heart Disease Enable users to analyze specific patient groups using interactive filters
FR-6	Report Generation	Publish the Tableau workbook and dashboard Generate project documentation and share insights through GitHub and Tableau Public

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The dashboard should be easy to understand and navigate.
NFR-2	Security	The dataset should be securely stored and used only for analysis.
NFR-3	Reliability	The dashboard should display accurate and consistent results.
NFR-4	Performance	Visualizations should load quickly and respond efficiently.
NFR-5	Availability	The Tableau dashboard should be available whenever required.
NFR-6	Scalability	The solution should support larger datasets in the future.
